Continuing Strong Quarterly Performance

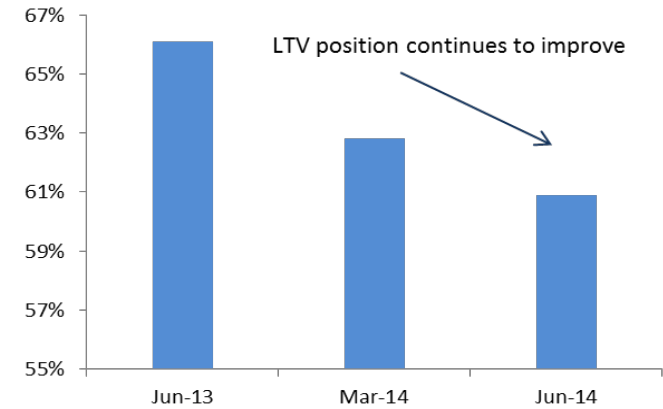

Underlying Profits Increasing

Higher Lending Volumes

Improving Indexed Loan To Value

- Strongly profitable quarter with underlying profits continuing to trend upwards
- 12 months EBITDA and PBT increased to £97.6m (£88.5m) and £52.0m (£45.0m) respectively
- Group is benefiting from continued strength in the UK housing market and is likely to benefit from the dislocation caused by the recent changes in mortgage regulation
- Continuing to increase lending volumes whilst maintaining credit quality setting the basis for significant step up in future profitability.
- Loan book grew by £50m during the quarter and now stands at £1.08bn
- Continue to report further reduction in levels of non performing loans and arrears

Nominal Interest (constant mix)	13.4%	13.1%	12.6%

Monthly Loan Advances

- Increased PBT and EBITDA during the Quarter – main drivers being increased advance levels, loan book growth and reduction in bad debt provisions
- Significant increase in lending activity over the past quarter from £104.5m to £125.9m with average origination LTV staying in the 55% area
- Interest income increased in the period reflecting higher levels of lending over the 6 months to June 2014 and lower levels of non performing loans. This increased net interest margin to 7%
- 50 bps decline in nominal rates in line with expectations and higher volumes
- The Group benefited from the release of bad debt provisions due to improving property valuations and increased liquidity. Changes were also made to our general provisioning policy in order to consider the likelihood and value of loss to create an 'Incurred but not Reported' provision rather than the flat rate general provision held previously resulting in a £1.1m provision reversal. The Group's provisions continue to fully cover exposure to negative equity

Group Highly Cash Generative

Quarterly Cash-flow

High Levels of Cash Generation

- Interest cover above 2x and significantly higher on a cash basis
- Quarterly consolidated group cash receipts of £110m
- Increase in Securitisation and RCF drawings to fund growth
- £126m of new advances with £2.6m of related funding costs
- Expenses including overheads, tax and capex totalled £8.6m
- Cash Interest was £5.2m plus £2.9m of fees related to the securitisation extension

EBITDA / Interest Cover

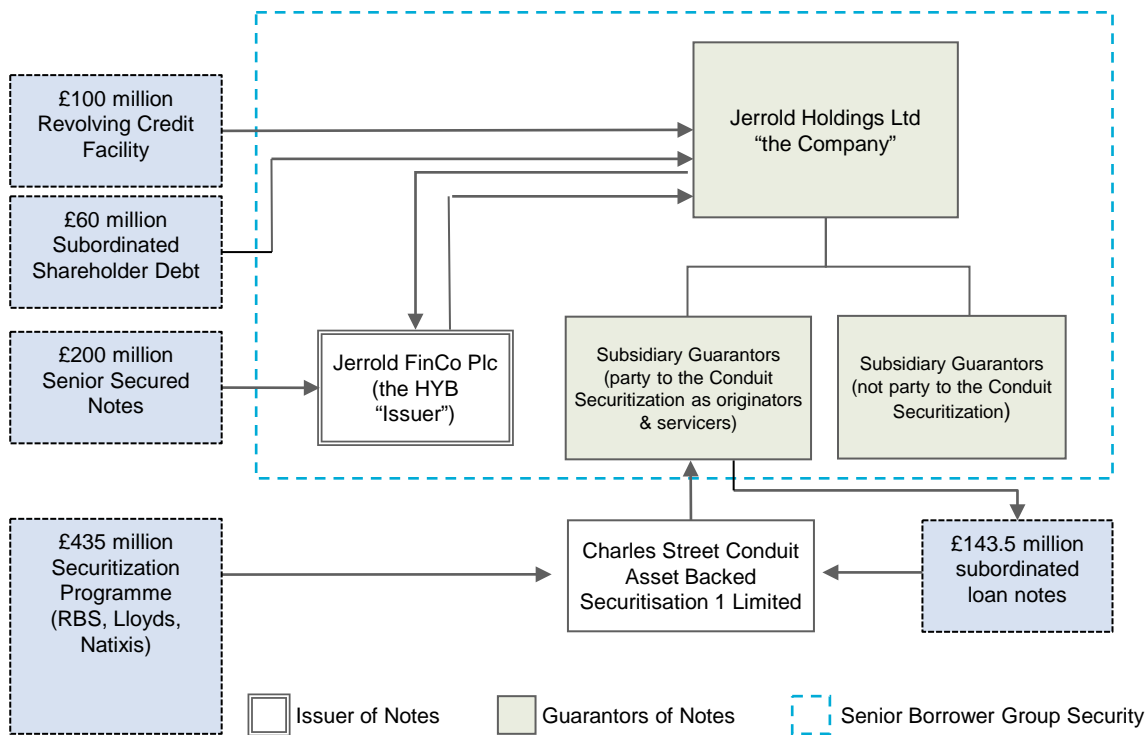

Cash Interest Cover

Calculated on a 12 month basis using cash available for debt service (prior to new advances) and excluding upfront fees

Funding Structure

Group Legal & Finance Structure

Liquidity and Funding

- Securitisation Programme formally extended and upsized during the quarter and now stands at £435m and as 10 September is fully utilized
- The facility has been extended until January 2018 (with a revolving period to January 2017) on favourable terms with RBS, Lloyds and Natixis
- The structure is currently being rated and a public rating is expected to be in place prior to 30 September 2014
- £65m undrawn headroom in the RCF

Continued Improvement in Loan Book Quality

Falling Level of Non Performing Loans

- Non performing arrears loans (NPL), development and repossessed / LPA loans in total fell by £14.2m in the quarter and £61.2m over the last 12 months reducing to £189m
- Within this total, non performing arrears loans fell by £10.3m. The value of loans in repossession was largely stable over the period, and remain a small proportion of the overall book
- The development loan book reduced by £2.2m to £85.3m. This is the net effect of sales, write offs previously provided for and a small number of further advances each month

Improving Security Position

- UK house prices have risen 15.6% from lows triggering a corresponding improvement in our security position
- Origination LTVs remain at low levels averaging 54.4% over the prior 12 months

Continued Improvement in Arrears Levels

Loan Book Segmentation

Arrears Performance by Vintage

Improving Arrears Trend

- High quality underwriting and well developed collection techniques have resulted in a reduced number of accounts in arrears
- Credit quality has been maintained over the past 12 months, with no increases in the percentage of credit impaired customers despite higher lending volumes.
- Arrears levels for loans written since 2010 have remained at consistently low levels and with continued improvements in vintage delinquency rates
- Proportion of performing accounts has continued to increase. Long term trend shows performing accounts increasing from 76.5% in June 2013 to 82.64% in June 2014, and increased in the last quarter by 2.2%

Low Level of Losses Underpinned by Low LTV Lending

Overall LTVs

- The WA indexed LTV of the total loan portfolio is 60.9% and 71.5% for the Borrower Group

Loans in Negative equity

- 4% of Group loans have an indexed LTV >100% (negative equity exposure has fallen from £18.2m to £15.9m over LTM).
- The Group's provisioning policy ensures that we make a full provision for our estimated potential exposure to negative equity for all non performing loans based on current indexed valuations. In addition an "incurred but not reported" provision has also been established in order to provide for the potential impact from events that have taken place but we have not yet been made aware of
- Percentage of loans within the Borrower Group with an origination LTV of > 75% is 19.5% (covenant 32%) vs 24% in June 2013

Downside Scenario Analysis

- We estimate that for the Group 10% and 20% falls in property values would result in additional exposure of £7.2m and £31.3m respectively
- We estimate for the Borrower Group 10% and 20% falls in property values would result in additional exposure of £7.0m and £28.3m respectively

Change to General Provisioning Policy

- Specific provisions and suspended income provisions remain unchanged
- Previously the Group maintained a general provision calculated as 0.5% of the loan book value after deducting suspended income and specific provisions in line with its requirements under its banking facility documentation
- This requirement was amended during the year introducing an 'incurred but not reported' principle as opposed to a flat rate provision thereby complying more specifically with UK GAPP
- The revised methodology uses historical data experience to estimate the likelihood of loans that are not in arrears moving to a >3 months arrears position and then subsequently rolling into repossession. That is to say it considers the potential impact from events that have taken place but we have not yet been made aware of, for example a customer having lost their job who may be in a position to continue paying for a couple of months but may eventually move to an arrears position and potentially a repossession
- It then considers the potential loss exposure on these accounts using indexed valuations. The change in methodology resulted in a £1.1m net provision release during the quarter to June 30, 2014

Overview of Conduit Structure

Notes: 1) As at 30 June 2014; 2) There is £3.1m of accrued interest on the loan notes at the end of the month and £5.7m payable to creditors. The net amount is the balance between the Conduit's assets and its VFN and subordinated debt funding; 3) Weighted Average indexed Loan to Value

Securitisation Overview

- The Conduit is a bankruptcy remote vehicle which buys qualifying loans from the Borrower Group
- As at June 2014 the Securitisation had £559.9m of assets comprising £527m of loans and £29.7m of cash^{1,2}
- The Conduit was funded by £410m of loan notes issued to its lenders, £143.5m of subordinated subscription notes issued to the originators. The subscription notes effectively represent the Borrower Group's equity interest in the Conduit¹
- The Conduit pays any surplus cash net of its costs to the Borrower Group on a monthly basis (c. £4.4m per month)

Transfer of Mortgage Loans

- Qualifying Loans originated by the Borrower Group are sold to the conduit at par on a random basis
- About 90% of loans originated by the Borrower Group are eligible to potentially be included in the Conduit on day 1
- Loans may be transferred back to the Borrower Group if they do not continue to meet eligibility criteria (typically arrears related)
- For the 12 months ending June 2014, £20m of loans were returned to the Borrower Group. These loans had a WA indexed LTV3 of 61.19%
- In the 3 years to June 2014 the Borrower Group's average annual capital losses on loans returned from the Conduit was £181k
